All of the stock offered is grown on my grounds, that grown from cuttings and divisions I know to be clean and true. Plants grown from seeds are from seed stocks obtained from the most reliable sources. Seeds, however, don't always come true to color of some kinds of plants.

PLANTS ARE ALL FIELD GROWN, ARE GIVEN CONSTANT CARE AND CULTIVATION AND WHEN SENT OUT ARE STRONG AND WELL DEVELOPED, MUCH LARGER THAN POT-GROWN PLANTS OFFERED BY OTHER FIRMS.

GUARANTEES

I guarantee all stock furnished to be first-class, true to name, and larger than pot-grown plants, all of a size so as to give immediate results.

However, there are so many causes for failure over which I have no control that I can assume no responsibility after stock is delivered. Poor soil, unfavorable weather, ignorant or careless culture—all contribute to failure and are beyond my control.

ROSA HUGONIS The New Golden Rose from North China

\$3.50

"Rosa Hugonis is not only the handsomest of the roses discovered in China during the last quarter of a century, but, in the judgment of many persons, is the MOST BEAUTIFUL of all roses with single flowers."

The first rose to bloom in early spring, Rosa Hugonis is a spectacular show in itself. Every branch of the previous year's growth becomes lined on both sides, to the very tip, with closely set, wide open, single flowers like dainty yellow hollyhocks and the branches bend over with the weight of bloom.

The long arching sprays make rare and exquisite indooror decorations in early spring when other flowers are scarce.

This unique species is fine for shrub planting and makes a symmetrical bush about 6 feet in height and the same in diameter when fully matured. One leading landscape gardener wants 175 next spring.
